

BIBLIOGRAPHY OF BIOETHICS FACT SHEET

The **Bibliography of Bioethics** was published annually from 1975 to 2009. Volumes 1-6 were published by Gale Research Company; 7-9 by Free Press/Macmillan; and 10-35 by the Kennedy Institute of Ethics, Georgetown University. Most of the volumes from 10 through 35 can be purchased from the Kennedy Institute. Pricing, much heavily discounted, is at: <http://bioethics.georgetown.edu/publications/biobib/index.html>.

The **Bibliography**, arranged alphabetically by major issues in bioethics, remains a specialized, authoritative, unified source of bibliographic data for the field covering the years 1975 through 2009. Abstracts of selected citations were included in the series. An especially informative feature was the inclusion of keywords from the unique **Bioethics Thesaurus**, as well as other descriptors (court decision names, geographic indicators, etc.) related to the subject matter of any particular document.

The compilation of the Bibliography, under the editorial direction of LeRoy Walters, Ph.D. throughout its publication, was indirectly supported by a series of grants and contracts from the U.S. National Library of Medicine. Its compilation ceased in 2010 with the conclusion of that support.

The Bioethics Research Library staff is in the processing of adding basic citation data to the ETHXWeb database – available at <http://bioethics.georgetown.edu/databases/index.html> – which will cover the entire time span of the **Bibliography of Bioethics**. Eventually, searching on ETHXWeb will provide author, title, and primary subject access to most of the citations found in the series. However, since abstracts, keywords and subject headings are not available throughout the time period covered, precise subject access is hampered.

In order to support in-depth scholarship, we encourage research libraries to retain a full set of the **Bibliography** as an historical record of the ethical, legal, and public policy aspects of bioethics.
